

- ideal partnering tool
- professional business matching
- virtual branch meetings across continents
- explore new markets easily
- discover business opportunities and find partners
- innovative, cost-saving, efficient

### ◦ What is EB Meeting®?

EB Meeting® is an efficient instrument to organize international **business partnering events** via internet. It is a **quick and easy** way for companies to explore new markets and get in contact with potential partners for business or cooperation in foreign countries.

EB Meeting® events are organized by Chambers of Commerce, business consultants, industrial associations or publishing houses located in different countries. They invite local companies to participate in a branch specific partnering event. This way, these organizations can give an **additional service and benefit** to their members,

clients or subscribers and create a new service offer or business opportunity for themselves acting as an organizer of EB Meeting® partnering events in their country.

For the participating companies, EB Meeting® is an ideal tool to **establish international contacts** and identify suppliers, distributors, research partners or other types of cooperation and support. They benefit from **fresh, preselected contacts** and **real time business proposals**. And they meet potential partners of their own specific branch who are interested in doing business **right now**.

### ◦ What participants say about EB Meeting®

"Well structured, **branch-specific information**, no time-consuming search for partners as when I search on my own on the internet."

"I am dissatisfied with the results of the typical business exploring missions. EB Meeting® is a suitable alternative to **find business contacts quickly and cost-effectively**."

"I am not exactly an internet genius, but I found EB Meeting® **very practical**."

"All the counterparts you meet in an EB Meeting® are of your branch and have **concrete interests**. You are sure to hit what you are aiming at."

"A very good idea for **exploring new markets**; the investment required to weave new business relations is very modest."

"A good idea for **getting in contact** with those countries which are lacking in branch specific fairs."

Searching for potential cooperation partners in foreign countries is always like looking for a needle in a haystack. With **EB Meeting®**, we have found the best way to shrink the haystack – and to help your clients save lots of time, energy and effort.
